

# HIGH5 DOGS

LIFESTYLE FOR TWO

## Functional Designer Leashes with a Contemporary Twist

The contemporary person is busy. Phones ring with coffee on the go. Life is hectic. Bringing a dog along with you with this lifestyle can sometimes be a big challenge.

High5dogs takes on this challenge by reinventing the traditional dog leash to make it better suited for a contemporary city living. With two patent pending Innovations and a bold and elegant style, High5dogs is introduces a complete new collection of dog gear for dynamic urban people who love to bring their four footed companions wherever they go.

**We have two patent pending innovations:**

- **CLIC mechanism**
- **Leader system**

***CLIC MECHANISM - LIFESTYLE FOR TWO***

With the Introduction of the CLIC leash, High5dogs is the first to incorporate an innovative system to the traditional leash where one can tether a dog with only one hand and in a single motion. The CLIC system makes it so much more convenient to bring your pooch pal along for any occasion.

Phone rings and you're holding your dog and a coffee? No problem. One CLIC ties your dog to a railing and so you can get to your phone. Paying for take out? One simple CLIC frees your hands so you can pay and add your condiments.

**LEADER SYSTEM - IT'S PERSONAL!**

We all know that dogs can respond differently to different settings. They can be relaxed during a walk in the park or sometimes they are more alert and sensitive to busy city streets. People too respond differently and how you leash your dog all depends on your personal preference and the circumstances. With the introduction of the Leader system, you can now easily switch the way you leash your dog with the same single leash.

A simple adjustment allows you to transition between 4 settings: training leash; traditional collar attachment; lasso; fixed size collar/leash combo. No more excuses for not bringing your pal along.

## H5D by HIGH5DOGS

After the launch OF High5dogs in 2016, the inventions of High5dogs were received with such an enthusiasm that Fang decided make them available to a bigger audience. Now a year later he started a premium sub-brand called H5D. This premium brand uses the patent pending innovations of High5dogs to create products with key values of functionality, simplicity and style.

## About High5dogs

### *An independent Lifestyle brand for dog lovers in the City*

In 2016, Dutch product designer Daniel Fang founded High5dogs, a new brand to the Pet Industry. Fang has a rich past designing with and for some of the worlds leading furniture and lifestyle companies and has been based in Hong Kong since 2007. Never active in the Pet Industry before, Fang couldn't find suitable gear for himself and his dog Gizmo, and decided to design it himself.

High5dogs/H5D creates innovative products that cater to contemporary needs in a timeless manner. Style is a must, not a goal. High5dogs/H5D develops its own hardware, uses bespoke rope and relies on high-end materials and craftsmanship. With the values of Innovation, Design and Convenience, High5dogs distinguishes itself on the market.
