The World's First Bluetooth Dog Training Collar!

BLUEFANG® Technology Lets You Train Your Dog Using Your Smart Phone as the Remote

High Tech Pet Products, 2476 Palma Drive, Suite A, Ventura, California, 93003

Our patent pending Bluefang ® is the only technology that provides real-time, two-way communication between you and your pet, allowing you to send behavioral commands, change collar settings and controls while using the full instrumentation in the collar to monitor your dog's activity, whereabouts and vital signs.

Bluefang ® starts out as the world's best Remote Dog Training, Bark Control, Electronic Fence Collar with the ability to accept future app upgrades that will allow you to monitor your dog's fitness level and even provide real-time fitness training statistics, showing you exactly how long and fast to run with your dog to get him safely into top physical, healthy condition. And that is just a few examples of what you will be able to do with your Bluefang ® Bluetooth dog collar. There are hundreds of more apps in the works that will make use of the advanced instrumentation that is already build into your Bluefang ® collar.

WHY INTRODUCE A NEW PRODUCT TECHNOLOGY AT SUPER ZOO? Pet retailers LOVE SUPER ZOO!!! The SUPER ZOO Show is the best-selling opportunity of the year—with over 15,000 prospective customers in attendance that are looking for latest hot-ticket items for their stores. Please stop by our booth at Super Zoo (#7179) to check out all of our new products!!!

High Tech Pet Products, Inc. is one of the oldest, largest and most trusted manufacturers of electronic pet products in America. Our company was founded in 1986 by a group of creative engineers who derive a great deal of enjoyment from developing the most imaginative, innovative and useful pet products on the planet. We manufacture a complete line of electronic pet items to solve your toughest pet peeves. For more information about High Tech Pet Products you can visit our website at www.hightechpet.com or contact our National Sales Director (Terry Stephens) at (260) 437-4237.
