CANNABIS CBD TINCTURES by ICELAND PURE

Imagine a possible natural treatment for Anxiety and Seizures for our furry friends made from all natural ingredients.

What is a cannabis CBD Tincture, cannabis has many components two of them are the most well known, one called THC, which is the Psychoactive component of the cannabis plant and the other the most important component of the plant which is the NON- Psychoactive called **CBD**.

Research has found that the CBD, the NON- Psychoactive component, can aid with among many other things

- **Seizures**
- **Anxiety**

I have been involved in the Cannabis Industry for over 5 years and I have seen firsthand the benefits of such products.

When the first CBD products came to market for pets what worried me was the fact that some had a high THC content for a pet and also that many of the CBD Tinctures were made with Industrial Hemp from China or imported Hemp from other countries which do not have the same safety guidelines that the USA has.

It took us several years of researching CBD grows and changes on State and Federal laws in order for us to develop our version of the cannabis CBD Tincture. Once again raising the bar for the market standards.

Iceland Pure CBD Tinctures are made with Organically Grown Hemp from Colorado with a clean CO2 extraction, we take that pure cannabis CBD oil extract and mix it with our Pharmaceutical Human Grade fish oils making a very unique product not only with the highest concentrations of CBD but also loaded with Omega 3 fatty acids.

We offer our product in two sizes and two types

100mg mix with 50ml of Iceland Pure Sardine Anchovy oil

1,000mg with 50ml of Iceland Pure Sardine Anchovy oil

1gram of pure CBD oil

All of our product have an Easy Syringe dispensing bottle to accurately dosage your furry friends.
