

**Doesn't your dog deserve a break?
Save Fido's joints and ease entry and exit into your truck bed with TWISTEP® for Trucks**

Hitch-mounted, swing-out TWISTEP for Trucks from PortablePET makes life easy—for your pet and you!

BELLINGHAM, Wash. – Think about it from your dog's perspective: The bed of that pickup is as tall, or taller, than your head. Jumping up or down from that height? You need a step to prevent jarring injuries.

Better yet, you need TWISTEP for Trucks, from Heininger's PortablePET—the easiest step-up solution anywhere, with a solid, reliable, twist-out extension step that makes for simple entry into an open tailgate.

Install TWISTEP for Trucks in minutes, and you'll never be more than about 3 seconds away from one-handed, twist-out convenience. No fumbling with step-stools, or unloading or unfolding cumbersome ramps. Just lift a pin, and rotate TWISTEP for Trucks out from underneath the bumper for use. Then fold it 180 degrees to stow under the bumper, ready for the next time.

Just like that, you've eliminated the repeated jumping into and out of a vehicle that can cause or aggravate your pet's arthritis, leg injuries, back sprains and other spinal damage. It helps young dogs avoid unnecessary stress on growing hips and elbows, eases all dogs' entry into the pickup bed at the end of a long day of hiking or hunting, and can be a real boon for older dogs, who may not otherwise be able to reach the truck bed on their own.

And as a bonus, TWISTEP for Trucks works great for humans, too, providing knee- and hip-saving easy entry and exit from the tailgate.

Here's what a veterinarian has to say about TWISTEP:

"By slowing dogs down and doing incremental steps into a vehicle, dogs won't be wrenching their backs, hips, and knees. If all my clients with big dogs used this product I'd see less animals for flare-ups and slipped disks." -Stuart Spencer, DVM

With high-quality, powder-coated construction and a durable, non-slip surface, TWISTEP for Trucks holds up to 400 pounds of dog or human on its 19-inch-by-22-inch platform. Fully assembled from the box, TWISTEP for Trucks installs easily in 2-inch hitch receivers.

Like the idea but own an SUV? Consider the standard TWISTEP, which features a secure step without the extra extension for hatch-type lift-gages on modern SUVs. Works great for pets to reach the cargo area—and for humans to reach the roof rack!
