

Product Name: Rescued Wine Candles

Location: Truckee, CA 96161

Website: www.rescuedwinecandles.com

Product Description: Using the best ingredients available and choosing to be environmentally responsible. We aspire to repurpose wine bottles with new candle life. Wine bottles are collected, cleaned and cut by hand, creating eco-friendly soy candles with fragrances inspired by wine.

Our Mission: Our mission is to give back to animal rescue groups and to better our environment one recycled bottle at a time. These beliefs ultimately guide us in producing a high quality, one-of-a-kind product with a greater purpose. We strive to help animals in need by donating a portion of our sales “not profit” to rescue groups.

Materials: Recycled wine bottles, 100% Soy wax, 100% Cotton wick, Fragrance.

Production Process: All of our candles are made from repurposed wine bottles. Discarded bottles are collected from local restaurants and resorts. The bottles we do not use, we recycle and save them from going into the landfill. We clean and cut the bottles by hand. We use 100% soy wax with 100% cotton wicks and hand-pour our soy candles in small batches to ensure freshness and quality. All of our products are made, labeled and packaged in our studio Truckee, CA.

Cheers!

Craig Davies
