RELEASE

LIFEGARD® LIGHTS UP YOUR TANK WITH LED LIGHTS

Lifegard Aquatics has introduced a complete line of exceptional quality LED Aquarium Lights designed to complement any size tank...and at an extremely good value. While the marketplace offers many to choose from, none compare in quality, features, variety...and price.

Lifegard Power-2 and Power-3 LED Systems allows our new technology to provide maximum light penetration deep into tank for appealing color enhancing and provides the correct wavelength of light to nourish corals and invertebrates. The **Ultra-Slim Blue/White Series** made of slim low profile aluminum in sizes to fit any freshwater or marine aquarium contains energy efficient super bright LED chips. 3 Mode ON/OFF switch allows manual transition from daylight to lunar with ease. The **Ultra-Slim Red/White Plant LED** for planted aquariums boasts 6500K LED's to deliver full spectrum and light intensity capable of underwater plant growth.

All models offer either WHITE LEDs for natural looking "Daylight", BLUE LEDs for nighttime "Moonlight" effect or RED LEDs for photosynthesis and plant growth. Safe for Freshwater or Saltwater Aquariums, each model includes waterproof touch control light switch, removable plastic stands, hanging clips and extendable metal bracket.
