

FOR IMMEDIATE RELEASE

President Michael Sweigart of Baja Unlimited, LLC, announced today that the world's largest retailer, Walmart has committed to purchase FurZapper, Pet Hair and Fur Remover for 3,888 of its stores.

The relationship with Walmart started when Walmart invited the management of FurZapper to Bentonville, Arkansas to have FurZapper compete as a showcase product in the Walmart Made In America program.

Over the next several months FurZapper was subjected to multi-level testing and investigation which proved FurZapper works!

FurZapper, with a patent pending, is the only product of its kind on the market today.

Sweigart said, "All you need to do is to place a FurZapper in the family washer and dryer and all pet hair and fur that was on clothing will go down the drain or get caught in the lint trap."

FurZapper works every time and solves the universal problem of getting pet hair and fur off clothing. It also works on blankets, towels, furniture slip covers, in short on everything!
