HIGHWAVE INC. CREATES A ONE-HANDED HYDRATION SYSTEM FOR DOGS THAT SAVES WATER

LAS VEGAS, NV (JUNE 26, 2018)—The AutoDogMug is a travel water bottle for pets that is designed for hydration during hikes, walks, or any other activity. Squeeze the bottle and water fills the bowl, let go and excess water gets sucked back into the bottle not wasting a drop. The one-handed hydration system is BPA free and is made in the U.S.A. The AutoDogMug is currently made in 6 different colors.

Public water bowls can contain harmful pathogens and travel water bowls are an inconvenience. The AutoDogMug is simple to use for any age. The bottle holds 20 oz and is transparent, so the user can see how much water is left in the bottle at all times. The dog water bottle comes with a velcro strap, which can attach to your backpack, purse, or leash. The AutoDogMug has a design and mechanical patent.

Highwave Inc. will be located at booth #1329 at Super Zoo 2018. Founders Gary and Diana Ross will be displaying more of Highwave's innovative designs.
