

Tool Klean Press Releases

UV Light Stik

The *Tool Klean UV Light Stik* is an excellent way to sanitize and clean large areas such as grooming tables, grooming arms, dryers, cages, vacuums, grooming stations, tubs and any large surface that may be exposed to microorganisms. With a slow sweeping motion over surfaces to be sanitized, the *UV Light Stik* can destroy most bacteria, viruses, molds as well as worm and flea eggs with the ultraviolet (UV-C) light. The *UV Light Stik* features digital operation, timer, automatic safety shut off when Stik is turned upward, and is battery operated. For more information visit www.toolklean.com

UV Light Oven

Sanitize your grooming tools and equipment quickly and effectively with state-of-the-art technology utilizing ultraviolet light (UV-C) that deactivates and destroys harmful microorganisms such as bacteria, molds, viruses, yeasts, protozoa, flea eggs and insect larvae. The *Tool Klean UV Light Oven* is a compact two-shelf unit that allows sanitization of your grooming tools and small equipment in one place quickly and efficiently. Excellent for scissors, hemostats, combs, and brushes, clipper blades, clippers, nail grinders, dryer nozzles, toothbrushes, bathing brushes, sponges, and grooming mitts. The *UV Light Oven* features two long lasting, hospital grade germicidal UV bulbs. The Oven comes with a timer, automatic on-off functioning door, wall mount brackets, shatter resistant coverings for the bulbs, and protective polarized window. For more information visit www.toolklean.com

The Hot Cup

Sterilize your longer metal grooming tools fast with the *Tool Klean Hot Cup*. Unlike wet disinfects, the *Hot Cup's* metal pot utilizes dry heat to disinfect. The Hot Cup reaches a temperature of approximately 225-250 degrees within 12 minutes. The heat is conducted by small glass beads that surround every area of your grooming tool for complete sterilizing

within 30 seconds. The *Hot Cup* is an excellent solution for all metal grooming tools in your fast-paced grooming salon. For more information visit www.toolklean.com
