Herders Hides™

A Rawhide Chew without the Chemicals **How?**

Sheridan, WY, May 29, 2018—UMMP llc. Introduces its New Item Herders Hides We Use An All Natural process to make Hide Chews for Dogs, The only chemical is Natural Lactic Acid (E270) derived from our fermented milk products. To both Clean and Preserve the Hides of Sheep, Cattle, that are then dried and formed into dog chews.

Without the addition of any of the caustic chemicals preservatives and additives most often used to produce these chews.

Our Patent Pending Process for making and preserving hide chews for Dogs based on traditional method by the herders the All-Natural Alternative to the use of multiple chemicals to process Rawhide.

A Dog Chew only treated with the Lactic Acid to process and preserves the Chews.
Now available for pre-order with delivery late summer 2018,
Safe for Pets.*as with any chew please supervise your pet when feeding our chews.
100% Natural and Nothing Else.,,

UMMP llc.is a USA investor owned and operated company in Mongolia since 2009 complete supply chain from herds to our own in-house processing facilities with a USA office in Wyoming to Focus on the US market..Our traditional local Mongolian products now available for the USA market directly.
