HIGHWAVE INC. INTRODUCES A DOG WASTE BAG & HOLDER THAT CAN ATTACH TO DOG COLLAR

LAS VEGAS, NV (JUNE 26, 2018)— Highwave Inc. introduces a patented new pet waste bag and holder. A patented tab is located on top of each bag and it makes it clear for the user to see “which end is up” and makes it much easier to open every bag. The loaded fastBAG dispenser comes with 20 bags per roll and is included in every 8-bag package with 160 bags total. The included holder gets smaller as you use it, making it easy to carry anywhere.

The holder design is simple to load and use. Bags are clearly marked to easily see where to tear each bag. The bag holder allows the user to see when you are low on bags unlike other dispensers. The bungee attachment adjusts to full or low bags on a roll and can attach to a dog’s collar.

The holder can be placed on a collar, small leash, or keychain. The bungee cord on the fastBAG conveniently assists the function to tear. Your pet can carry their own fastBAGs instead of having a dangling dispenser or tied bags around a leash.

Highwave Inc. will be located at booth #1329 at Super Zoo 2018. Founders Gary and Diana Ross will be displaying more of Highwave’s innovative designs.
