## **GLOBAL HEMP INDUSTRY LEADER FOLIUM BIOSCIENCES DIVERSIFIES ANIMAL HEALTH LINE AT**

**Colorado Springs, CO, May 28, 2019** – Folium Biosciences will be exhibiting at SuperZoo, The National Show for Pet Retailers. This event will be from August 20-22, in Las Vegas. SuperZoo plans to have over 21,000 pet professionals from across the U.S. and around the world together with over 1,100 exhibitors in nearly 300,000 square feet of expo space. As North America’s premier pet industry trade show, SuperZoo has been named one of Trade Show Executive (TSE) magazine’s Fastest Growing 50 and to TSE’s Gold 100 and Trade Show News Network’s (TSNN) 25 Fastest Growing Trade Shows. It sets the industry standard for showcasing the latest pet product innovations and emerging industry trends.

Folium’s booth will display their successful Animal Health line, that includes specially formulated CBD-infused Bacon Dog, Salmon Cat Tinctures, Animal Tinctures, Pocket Pet Pellets, K-9 CBD-infused Beef Soft Chews and Equine Hemp Pellets.

“We focus on leading the way in scientific formulation and development, to ensure we design technologically advanced phytocannabinoid-rich products that specifically serve the needs of the Animal Health space,” said CEO Kashif Shan. “This is why we brought Animal Health expert and Chief Veterinary Officer, Dr. Robert Silver onboard three years ago.”

Dr. Silver has over three decades of experience in the Animal Health space with a focus on phytocannabinoid-rich solutions over the last decade. He established one of the first integrative veterinary practices in Colorado, where he pioneered herbal and dietary approaches to many of the more difficult chronic conditions seen in veterinary practice. As an herbalist and integrative veterinarian in Colorado since the early 80’s, Dr. Silver was able to observe first-hand the benefits of many herbal and nutraceutical approaches to pet health including the use of cannabinoid therapeutics in pets. Dr. Silver has also provided post-graduate education to veterinarians for the past 20 years and has served on a stakeholder’s commission for the Colorado Department of Agriculture to determine the suitability of industrial hemp for animal feed in Colorado.

“Animals have an endocannabinoid system much like humans and can benefit from cannabinoids in the same way”, said Dr. Silver. “Our Broad Spectrum 0.0% THC oil is absolutely safe for pets as it contains no psychoactive component whatsoever.”

Dr. Silver is active in the veterinary research community to help create successful animal health studies and clinical trials. He also works closely with Folium Biosciences’ VP of Product Development and Quality, M. Vanessa Fernandez, Ph.D., whose impressive background includes Scientific R&D and over 12 years as a cannabis field and product development expert in Europe.

“Our scientific expertise working in this space, coupled with Dr. Silver's extensive veterinary background will serve as a foundation in building out a comprehensive product line,” commented Dr. Fernandez, who has authored numerous scientific papers in the pharmaceutical cannabinoid space.

Folium Biosciences is the world’s only hemp company issued a Certificate of Free Sale and a Manufactured Food Establishment License by the Colorado Department of Public Health & Environment (CDPHE). These certifications help establish Folium Biosciences as the industry’s premier hemp company for manufacturing, processing and fulfilling of Folium Biosciences’ phytocannabinoid-rich CBD oil, water-soluble technologies and finished food products. No other hemp company has met the requirements needed to be licensed as a Manufactured Food Establishment and receive a Certificate of Free Sale.

## **About Folium Biosciences**

Folium Biosciences is the largest vertically-integrated producer, manufacturer, and global distributor of hemp derived phytocannabinoids in North America, if not the world. It is a B2B, bulk and wholesale supplier of hemp derived CBD 0.0% THC oil, CBD water-soluble technology, CBD 0.0% THC edibles, cosmeceuticals and CBD for animal health. Folium Biosciences continues to develop rare cannabinoid extraction and product formulation and is a leader in cannabinoid technology and protocols.

Folium Biosciences has over 300K square feet of manufacturing space in southern Colorado which supports processing, extraction, and purification operations. Construction has begun on a 170K sq. ft. facility in Canada that will mirror current operations in Colorado. South American facilities are in the developing stages.

Most recently, Folium Biosciences successfully acquired FeyeCon Development and

Implementation, BV and FeyeCon, BV (“FeyeCon”), located in Amsterdam, B.V. FeyeCon is one of Amsterdam’s first licensed cannabis researchers and developers and designs and fabricates custom, state-of-the-art, large scale processing equipment and supercritical CO2 extraction machinery.

By manufacturing its own custom extraction, refinement and post refinement equipment, Folium Biosciences enjoys exclusive access to the industry’s most advanced and state-of-the-art extraction equipment. This additional level of vertical integration allows Folium Biosciences to control every phase of the production process, from seed to sale.
