## **HIGHWAVE INC. INTRODUCES A LEAK-TIGHT 44 OUNCE DOG WATER BOTTLE**

LAS VEGAS, NV (8/20/2019)— Highwave invented the AutoDogMug® Original in 2014, and now has a new leak-tight 44 ounce version. The Growler is the perfect hydration system for larger breeds, long car rides, and camping trips with your dog. The Growler features a leak-tight lock in the center of the bowl. When storing, twist the lock and the leak-tight valve will engage, not allowing any water leak in your backpack or car.

The Growler is available in 4 different colors and is BPA free. Each bottle holds 44 ounces and comes with a carabiner to attach to a backpack. Squeeze and water enters the bowl for your dog to drink. Release your squeeze and the excess water drains back into the bottle not wasting a drop.

Highwave's mission for 35+ years has been to help humans live in harmony with our planet. The engineers at Highwave are constantly inventing reusable products that make people's lives a little bit easier. Everything from our travel mugs from humans, to our travel mugs for dogs has been designed to respect the Earth and its natural resources.

Highwave will be at booth #1349 at SuperZoo showing more of their innovative products.
