CATALYST™ NATURAL, UPCYCLED LITTER OUTPERFORMS CLAY Louisville, CO

Catalyst[™] Pet is unveiling at SuperZoo 2019 their Healthy Cat Formula Cat Litter - the only natural cat litter that outperforms clay litters and offers exceptional cat acceptance. Engineered from upcycled soft wood, it's the responsible, renewable, sustainable litter choice that cats actually love.

CatalystTM Pet was created by Lignetics, Inc. - the largest upcycler of wood fiber in the US. CatalystTM is on a mission to love our pets and save our planet. By solving the challenges with natural litters and clay litters with renewable wood waste, the Healthy Cat Formula litter finally enables all consumers to shift from clay to a high-performing alternative.

"CatalystTM is the first natural litter with real potential to disrupt the prominent position of claybased litters on the shelf with exceptional performance and powerful sustainability benefits. We're very excited to unveil it at SuperZoo given their long history of helping launch many incredibly innovative products," says Bret Jordan, CEO of Lignetics, Inc.

"While over 20% of consumers have tried a natural cat litter, only less than 5% of consumers continue to use them - often because of performance and cat acceptance" says Jonah Levine, Product Manager for Catalyst™. "We've developed this product to not only give those consumers an option that they'll be happy with but give all consumers a viable choice and positive experience when making the change to a natural litter."

Catalyst[™] Pet is currently completing development of a Multi-Cat and Unscented Formula to offer all consumers a sustainable, high-performing option that fits their preferences.
